HIGH-PRECISION STRUCTURE

Right and Left Machine Structure

The LV500 Series consists of Left and Right machine configuration, allowing for more efficient automation options. (Except LV1100)

Front Operation Structure

The power supply, hydraulic device and lubrication device are all designed to be controlled on the front side of the machine, leading to enhanced user convenience.

COLUMN

Fixed Type Column (LV500 Series)

The LV500 Series is designed with a fixed column to minimize vibration during axial movements.

Moving Column (LV1100 Series)

The LV1100 Series Features a traveling column to maintain superior accuracy when turning larger work pieces.

Step Type Bed Structure

For the LV1100 Series, the column feed unit of the bed is designed to form steps, so that the load generated in the front during machining operations may be minimized. Also, by optimizing the weight of the column, feed stability is enhanced.

02 HIGH PRECISION SPINDLE

Long Lasting, High Accuracy & Excellent Performance CNC Turning Center

HEAVY DUTY CUTTING & HIGH ACCURACY

SPINDLE

Spindle for Heavy Cutting

The use of both cylindrical roller bearings and angular contact bearings provide high speed and rigidity. This enables machining of heavy workpieces. Also, LV1100 Series is with a gear box spindle, which provides high torque at low rpm and stability at high rpm.

C-Axis Control ('M' Type)

The C-axis is capable of 0.001° control when milling turret is applied. Machining capability is strengthened with turning and milling operations.

2 Step Pressure Chucking Device

The 2 step pressure chucking system enables high pressure chucking during rough cutting and low pressure chucking during precision cutting.

SERVO TURRET

Servo Turret

The LV500/1100 Series' machining reliability is enhanced by incorporating a high performance AC servo motor to the turret drive mechanism. Also, the turrets are installed with 3 piece couplings to improve indexing accuracy. Powerful hydraulic tool clamping exhibits great heavy duty machining performance by minimizing tool tip deviation due to work load.

MILL TURRET

BMT Turret ('M' Type)

The BMT turret secures the tool with four bolts and key on the tool mounting surface of the turret, making it possible to powerfully fix the tool, ensuring high reliability in rigidity and precision.

STRAIGHT MILLING HEAD

ANGULAR MILLING HEAD

Mill Tool Holder

Machining capability has increased with the addition of straight milling head tool holder, which can machine workpieces from the side, and angular milling head tool holder, which can perform I.D. operations.
